

**Silverback PO+ is a new label solution which can be adhered in all warehouse temperatures.**

Label solutions can be varied in both man-down and man-up fork lift pallet racking applications. We aim to design the most appropriate and cost-effective application.

**1. Split Beam Label**

To identify a location on the ground and a pallet on the first beam level.

**2. Upper Beam Label**

To identify a location on beams above the split beam label location. On man-up applications where the operator is closer to the label these can be smaller than in man down applications.

**3. Upright Label**

Applied to the racking upright and used in man-down applications to enable the operator to scan upper locations at low level.

**4. Stepped Beam Label**

Also used in man-down applications but applied to the beam to enable the operator to scan upper locations at low level.

**5. Level Indicator**

A simple but cost-effective way of identifying a beam level in man-down applications. A coloured label is applied to the beam and matches the location colour shown on the upright or stepped beam label.

**Lifetime scanning guarantee for all laminated labels.**

**“Our vision is to be the supplier of choice for warehouse and industrial identification, safety systems and associated products, offering clients a quality-driven, total solution via multi-channel procurement methods.”**

# Labelling and Safety Solutions to reduce time and costs

## Products available:

- Location labels, aisle markers and identification products
- RackNets™ safety netting and other safety netting products
- Warehouse safety products including safety signs right through to floor and line marking solutions
- Label holders to provide a range of ID solutions for shelving
- Load notice signs (SEMA signs)
- Machine guarding
- Mesh partitioning and security fencing
