

Man-down Location Label SOLUTIONS

We can provide a complete range of man-down location label solutions to suit all manufacturers' types of racking and shelving.

Manufactured from stable materials, each label is laser printed to ensure excellent visibility, barcode verification, and superior durability.

Man-down location labels are designed so you can scan a location at higher level from the ground.

This can be done in two ways:

1. Upright labels – a label designed to adhere to the pallet racking upright which indicates the locations from ground to all levels above.
2. Stepped beam labels – a label designed to adhere to the first beam level as long as it is within range of the scanner.

“Our vision is to be the supplier of choice for warehouse and industrial identification, safety systems and associated products, offering clients a quality-driven, total solution via multi-channel procurement methods.”

Tony Gresty
Managing Director – Warehouse Partners

Labelling and Safety Solutions to reduce time and costs

Products available:

- Location labels, aisle markers and identification products
