

Labelling and Safety Solutions

Machine Guarding – STRONG/HEAVY SYSTEM

Our machine guarding and safety systems are tailored exactly for you. All safety equipment is designed and manufactured to Machinery Directive 2006/42/CE.

A protection and safety system designed for accident prevention, consisting of uprights 60mm x 60mm, and panels with frames 20mm x 20mm or 30mm x 30mm, connected by fast-assembly clips patented by SATECH.

It's used in heavy conditions such as in industrial robotics or in steel industry applications.

SATECH has developed a connecting system between panel and upright that achieves remarkable time savings during assembly and height adjustment. It also allows easy reinstallation of the guard after it has been removed for non-routine maintenance (EN 953+A1 6.4.3.1 b).

All SATECH products have been designed in accordance with the European Directive on the Safety of Machines (2006/42/CE).
