

Hand Rail Safety Netting

Hand rail safety netting is a cost-effective and efficient method of improving employee safety.

Hand rail safety netting creates a barrier between the edge of the mezzanine and the ground below, subsequently preventing any stock falling between the railings and potentially injuring employees.

The netting is made from high-tenacity polypropylene which is lightweight, incredibly strong and almost impossible to damage during normal operation.

We offer a hassle-free yet comprehensive installation service carried out by trained professionals. All the nets arrive on site pre-cut to size to further speed up the installation.

The nets can be affixed to new installations or retro-fitted to existing railings.

- Creates a safer working environment for your staff
- High-tenacity polypropylene stitched chord
- Made-to-measure
- Removable and cleanable
- Available in a variety of colours

“Our vision is to be the supplier of choice for warehouse and industrial identification, safety systems and associated products, offering clients a quality-driven, total solution via multi-channel procurement methods.”

Tony Gresty
Managing Director – Warehouse Partners

Labelling and Safety Solutions to reduce time and costs
